POLICY:
All professional health care personnel must be qualified and trained for assigned responsibilities.

PROCEDURE:
I. MEDICAL ASSISTANTS

A. Medical Assistants (MA) are unlicensed health personnel who perform basic administrative, clerical, and non-invasive routine technical supportive services under the supervision of a licensed physician. The licensed physician must be physically present in the treatment facility during the performance of authorized procedures by the MA.

B. Training may be administered under a licensed physician; or under a RN, LVN, PA, or other qualified medical assistant acting under the direction of a licensed physician. The supervising physician is responsible for determining the training content and ascertaining proficiency of the MA. Training documentation must be maintained on-site and include the following:

- Diploma or certification from an accredited training program/school, or
- Letter/statement from the current supervising physician that certifies in writing: date, location, content, and duration of training, demonstrated proficiency to perform current assigned scope of work, and signature.

II. MEDICATIONS

A. Unlicensed staff must have evidence of appropriate training and supervision in all medication administration methods performed within their scope of work.
   - Medication administration by a MA means the direct application of pre-measured medication orally, sublingually, topically, vaginally, or rectally; or by providing a single dose to a patient for immediate self-administration by inhalation or simple injection.
   - The pre-labeled medication container must be shown to the licensed person prior to administration.
   - To administer medications by subcutaneous or intramuscular injection, or to perform intradermal skin tests or venipunctures for withdrawing
blood, an MA must have completed at least the minimum number of
training hours established in CCR, Title 16, Section 1366.1.

- An MA may administer injections of scheduled drugs, including
  narcotic medications, only if the dosage is verified and the injection is
  intradermal, subcutaneous, or intramuscular.
- Medical assistants may not place an intravenous needle, start or
  disconnect the intravenous infusion tube, administer medications or
  injections into an intravenous line, or administer anesthesia.
- The supervising physician must specifically authorize all medications
  administered by an MA by means of a specific written or standing
  order prepared by the supervising physician.

III. IDENTIFICATION OF HEALTH CARE PRACTITIONERS

A. A health care practitioner shall disclose his or her name and practitioner’s
   license status, as granted by the State of California, on a nametag with at
   least 18-point type. A health care practitioner in a practice or office, whose
   license is prominently displayed may opt not to wear a nametag.

   Note: It is unlawful for any person to use the title “nurse” in reference to
   himself or herself, in any capacity, except for an individual who is a registered
   nurse or licensed vocational nurse.

IV. TRAINING OF SITE PERSONNEL

A. Personnel on site must be qualified for their responsibilities and adequately
   trained for their scope of work. Site staff should have a general
   understanding of the systems/processes in place, appropriate supervisions,
   and knowledge of the available sources of information on site.

B. Provider and staff must be able to demonstrate operation of medical
   equipment used in their scope of work.
